# Exploring the Power of OpenTelemetry on Kubernetes

*Pavol Loffay, Benedikt Bongartz, Yuri Oliveira Sa,  
Kristina Pathak, Severin Neumann*

# Session Q+A

**Pavol Loffay**

Principal Software Engineer,  
Red Hat

 @cncf/Pavol Loffay

 pavolloffay

 @ploffay

**Severin Neumann**

Open Source Program Manager,  
Cisco

 @cncf/Severin

 svrnm

 @svrnm

**Kristina Pathak**

Staff Software Engineer,  
LightStep

 @cncf/Kristina Pathak

 kristinapathak

**Yuri Oliveira Sa**

Software Engineer,  
Red Hat

 @cncf/Yuri Oliveira

 yuriolisa

 @yurioliveirasa

**Benedikt Bongartz**

Senior Software Engineer,  
Red Hat

 @cncf/Bene Bongartz

# Agenda

- Prerequisites
- Observability in a nutshell
- The OpenTelemetry Project
- **Hands on session!**
- Roadmap: What's coming next?

# Prerequisites

Terminal of your choice

Access to K8S  
v1.19 - v1.26

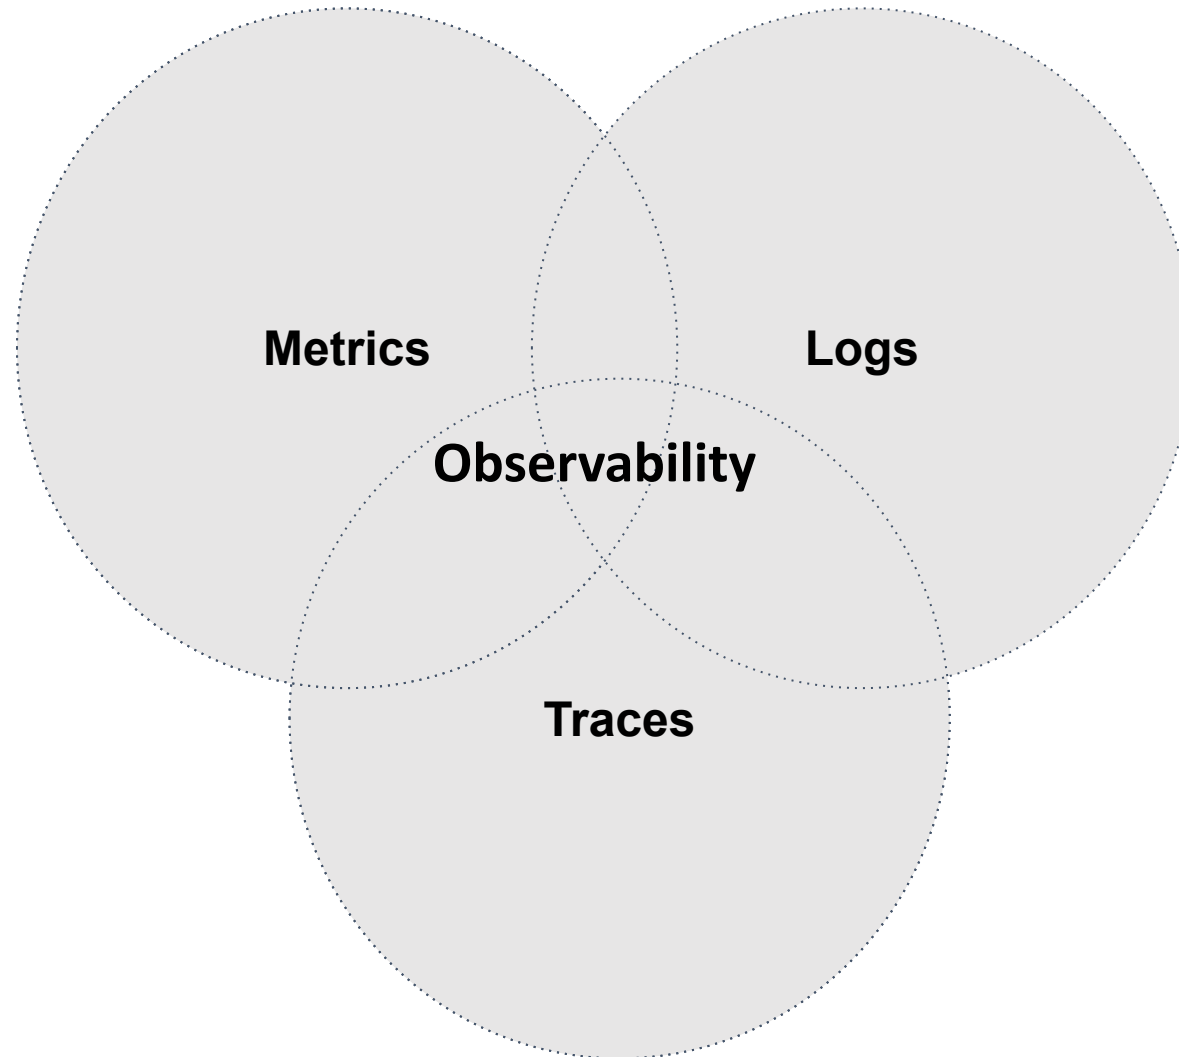

Containerization tool  
docker/podman

Open:

<https://bit.ly/otel2023>

# Observability in a nutshell

# Observability & OpenTelemetry

- Open source!
- Cloud Native Computing Foundation (CNCF)
- Vendor neutral telemetry data collection
- Specification, API, SDK, data model - OTLP, auto-instrumentation, collector
- Helm chart, Kubernetes operator

# Schedule

○ Tutorial on Apr 22, 2023

## OpenTelemetry Collector 101

**Benedikt Bongartz** authored and committed today

Verified

10min

## OpenTelemetry Operator Introduction

**Pavol Loffay** authored and committed today

Verified

10min

## How to instrument your application properly

**Pavol Loffay** and **Severin Neumann** authored and committed today

Verified

30min

## Collecting metrics and integrate with Prometheus CRs

**Kristina Pathak** authored and committed today

Verified

15min

## Getting started with OpenTelemetry Logs

**Yuri Oliveria Sa** authored and committed today

Verified

10min

## Roadmap: What's Coming Next

**Yuri Oliveria Sa** authored and committed today

Verified

5min
